Queen of Peace Students Hold Mu Alpha Theta Lock-In

Queen of Peace High School's Math National Honor Society – Mu Alpha Theta – held an overnight lock-in Sept. 24 at the school. The society's four officers designed an itinerary which included two ice breaker games for the junior and senior members to become familiar with each other; a mathematical order of operations scavenger hunt; and designing tie-dye T-Shirts.

Mu Alpha Theta has over 75,000 student members in more than 1,500 schools worldwide and its main goals are to inspire keen interest in mathematics, develop strong scholarship in the subject and promote the enjoyment of mathematics. Candidacy is determined by GPA requirement and teacher recommendations. Once inducted, members participate in tutoring and local math competitions.
